

Data Flow Diagram & User Stories

Date	27/09/2026
Team ID	SWTID-2026-8900
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Data Flow Diagrams:

A **Data Flow Diagram (DFD)** is a traditional visual representation of the information flows within a system. A neat and clear DFD depicts the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Data Flow Description (Level 0 / Level 1 Workflow):

- ❖ **User Request:** The user places an order for a "Standard Laptop" via the **Service Catalog**.
- ❖ **Trigger:** Ordering the catalog item triggers the custom **Flow Designer** flow (Standard Laptop Task).
- ❖ **Approval Evaluation:** The flow checks for request approval state (Approved).
- ❖ **Task Generation:** Upon approval, the flow automatically generates a **Catalog Task** (SC_TASK) with pre-configured details (Short Description, Description, and Approval).
- ❖ **Assignment:** The task is routed and assigned directly to the **Hardware** group for laptop configuration and fulfillment.

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
End User / Employee	Self-Service Procurement	USN-1	As an end user, I want to request a standard laptop from the Service Catalog so that I can get a device assigned for work.	The "Standard Laptop" catalog item is visible under the Hardware section and allows clicking "Order Now".	High	Sprint-1
End User / Employee	Order Tracking	USN-2	As an end user, I want to track the approval and fulfillment status of my requested item so that I know when my laptop will arrive.	RITM and Request records display updated approval status and assigned fulfillment tasks.	Medium	Sprint-1
Approver / IT Manager	Request Approval	USN-3	As an approver, I want to review and approve	Right-clicking and selecting "Approve" successfully	High	Sprint-1

			laptop request tickets so that procurement requests are verified before fulfillment.	advances the flow to task creation.		
IT Procurement Team	Automated Workflow	USN-4	As an IT procurement member, I want the system to automatically trigger a Flow upon request approval so that manual task creation overhead is eliminated.	Flow Designer executes "Standard Laptop Task" automatically when an item is ordered.	High	Sprint-1
Hardware Fulfillment Team	Task Assignment & Configuration	USN-5	As a member of the Hardware team, I want configuration tasks automatically assigned to the Hardware group with pre-populated details so that I can configure laptops without delay.	A Catalog Task is generated with Short Description and Description set to <i>"Laptop need to Configured"</i> , assigned to group <i>"Hardware"</i> .	High	Sprint-1
